

OUR ENVIRONMENTAL SUSTAINABILITY POLICY

As a global technology services provider with more than 96,000 employees worldwide, we view the minimizing of our impact on the environment as a key business principle.

The objective of CSC's Environmental Sustainability Policy is to maximize resource efficiencies and reduce waste streams, while ensuring an effective use of electricity, water and non-renewable resources. By focusing on a holistic approach, our goal is to ensure prudent environmental stewardship across our operations. We also recognize that we have a role to play in communicating good environmental practices outside our company.

CSC and our Corporate Responsibility (CR) Governing Board will work with employees, partners, suppliers and clients to deliver environmental policy objectives. In order to accomplish these objectives, CSC will:

- Maintain ISO 14001 Environmental Management System (EMS) certification at select facilities and data centers, incorporating procedures for continual improvement, to ensure compliance with all applicable environmental legislation and other environmental requirements and to prevent pollution
- Develop and implement a global energy use measurement and monitoring program
- Measure, manage, and endeavor to reduce staff travel impacts
- Promote recycling and use of recycled materials, while striving to reduce the consumption of all materials wherever possible
- Endeavor to reduce energy and water consumption, implementing continuously improving efficiencies into facilities and data centers
- Work closely with our employees to develop and implement environmental improvement initiatives
- Enhance our supply chain's environmental sustainability and, where practicable, seek out environmentally friendly suppliers
- Support client endeavors to achieve their environmental objectives, through developing and offering market-leading sustainability solutions and incorporating sustainable principles into business solutions
- Engage with and encourage suppliers and contractors who are actively minimizing their impact on the environment
- Provide an environmentally sound workplace for our employees and establish standards that promote the use of environmentally friendly processes and materials that complement and enhance existing safety standards
- Communicate our Environmental Sustainability Policy and our commitment to environmental best practices, to employees, clients and other stakeholders, and make known to the public
