

ENVIRONMENTAL POLICY

- **Advanced Energy** is committed to protecting the environment affected by our operations, products, and services. In support of this commitment, we will comply with applicable environmental laws and regulations; reduce pollution; measure and continually improve our environmental performance; and conserve natural resources, including materials, energy, and water.
- **We will** meet these objectives by:
 - Engaging our employees and contractors;
 - Considering and working to minimize the environmental risks associated with our materials choices, operating practices, and our customers' use of our products.
 - Developing safe and efficient products; and
 - Working collaboratively with our customers, suppliers, and the communities where we operate.
- **We will** fully integrate stewardship into our business processes and management systems, and enable our customers to do the same, as we pursue sustainability leadership in the industries we serve.
