## Social

### Public Welfare Undertakings

Xinyi Glass has been conscientiously fulfilling its social responsibilities, and has made continuous efforts for constructing energy-conservation and environmental-friendly space with customers and partners, so as to make people live a conformable life and maintain the sustainable development of the society.

As a member of the local community, Xinyi always insists on the concept of repaying the society, and plays an active role in public welfare undertakings, building of the Hope Primary Schools and setting of public welfare fund and has made positive contributions to the public welfare, education, disaster relief and environmental protection in a practical way.

With great contributions to the society, the Group has won several titles of honor and awards, including the title of "Humen Education Supporter" granted by Dongguan Humen government, the "Most Caring Enterprise Award" granted by Shenzhen Spiritual Civilization Construction Commission, "Outstanding Contribution Award for Credit Construction 2007" granted by Shenzhen Credit Union and "Public Welfare Honor Award" granted by Hong Kong Public Welfare Committee.

### Green Action

With worsening natural environment and aggravating climate change, the world's sustainable development is facing a huge challenge.

Xinyi Glass has made continuous efforts for constructing energy-conservation and environmental-friendly space so as to make people live a conformable life and maintain the sustainable development of the society. Based on scientific attitude, advanced technology, superior quality and rigorous management, Xinyi has finished the "gas instead of oil" project, introduced the safe and clean fuel – natural gas, improving people's living quality and optimizing urban environment. The Group stands on the height of society prospective, and has been working hard to create green life. To meet the requirements of the state on energy-conservation and consumption reduction, Xinyi Glass built pure low temperature waste

### Recommended Column

heat power generation stations in Dongguan and Jiangmen successively, committed to realizing the win-win in enterprise values and social values.

Xinyi Glass keeps pace with the development steps of low-carbon economy closely, and has made new innovations after another in development of green products to promote the popularization of energy-conservation and environmental-friendly concepts. All our products are energy-conservation ones meeting the social needs, for instance, the building glass was selected as low-carbon energy-conservation product by Shanghai Expo China Pavilion, Xinyi SOLAR-X heat-reflecting automobile glass is currently the sole energy-conservation glass patent product in China and Xinyi is also one of the largest and most competitive PV glass manufacturers in the world.
