

ENVIRONMENT

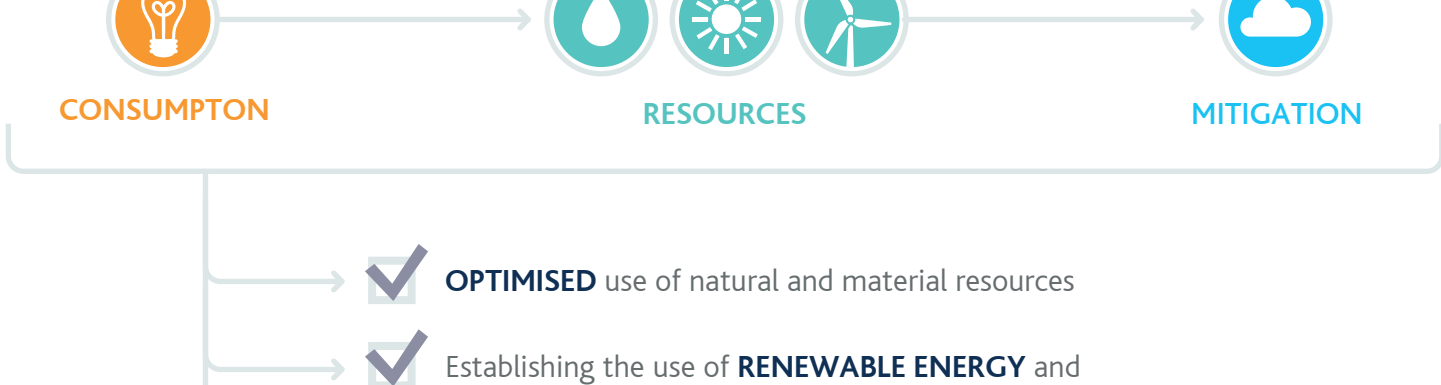

The continuous improvement cycle is based on the management systems according to ISO 14001 standards. Mitigation of climate change, waste generation and management, biodiversity management and noise, as well as raising environmental awareness are the main working areas.

ENVIRONMENTAL ASPECTS

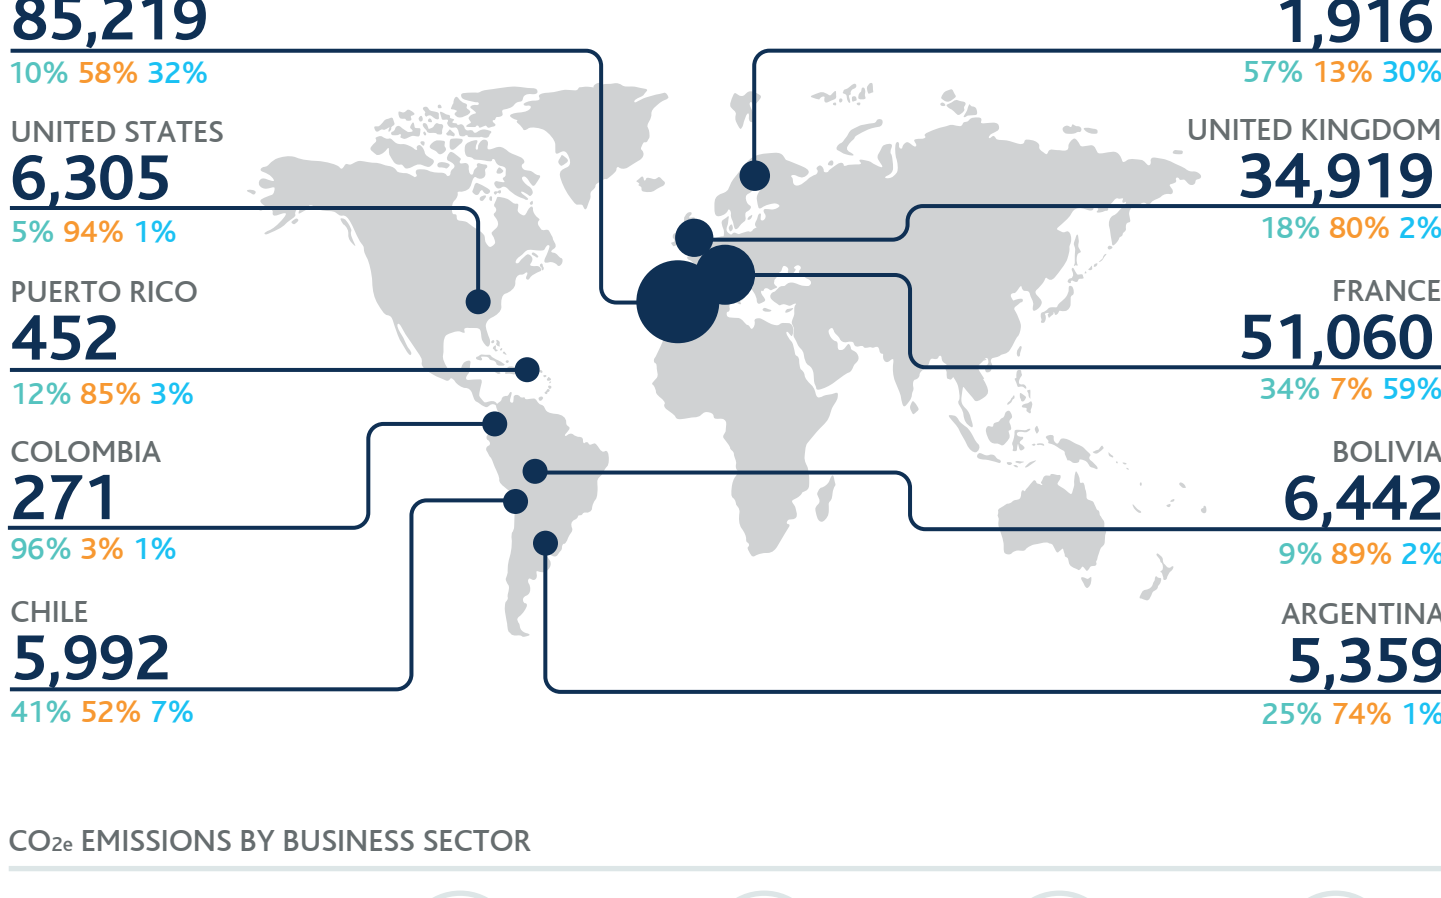

CLIMATE CHANGE

- ✓ OPTIMISED use of natural and material resources
- ✓ ESTABLISHING the use of RENEWABLE ENERGY and FUELS WITH LESS ENVIRONMENTAL IMPACT
- ✓ EXTENDING THE COMMITMENT to mitigate climate change to employees, customers and suppliers

CO₂e EMISSIONS (t)

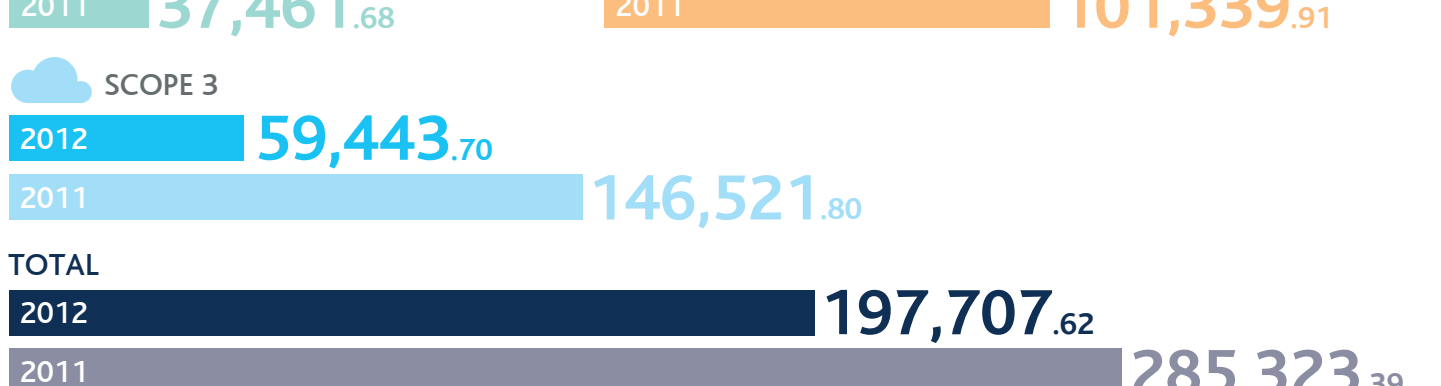

CO₂e EMISSIONS BY BUSINESS SECTOR

EMISSIONS (t)	Water Pollution	Impact on Biodiversity	Noise Pollution	Resource Consumption
SCOPE 1	26,191.78	2,904.43	8,619.58	28.04
SCOPE 2	22,146.99	36,421.47	39,951.46	2,000.17
SCOPE 3	55,442.81	2,480.76	1,281.94	494.75
TOTAL	103,781.58	41,806.66	49,852.98	2,522.96

EMISSIONS ACCORDING TO TURNOVER (t CO ₂ e/M€)	Water Pollution	Impact on Biodiversity	Noise Pollution	Resource Consumption
SCOPE 1	8.79	7.58	32.80	5.02
SCOPE 2	7.43	95.01	152.02	357.75
TOTAL	34.82	109.06	189.69	451.26
